The Aftershock team is committed to providing high quality programming to our students afterschool. Although the present circumstances have made it more of a challenge for us to offer as robust of programming as we would like to, we have accepted this challenge and continue to adapt. That is why our sign up form looks a bit different. Students will be placed into a colored group.

They will stay with this group for all of Quarter 3. The Aftershock schedule will not change. The adjustments have been made to address staffing shortages, complying with directed health measures, and offer more flexibility for our team to best serve students with high quality programming. We feel that this will allow us to be more flexible, intentional, and safe.
