

MARCH NEWSLETTERS:

Featuring: Mrs. Gray and Mrs. Lewis

What's the Buzz in 4G?

The 4th graders have been working extra hard this year! They are learning new concepts in math, reading, science, NE History, and writing, and they are totally rocking at it. Below are a few notes on the specifics of what's going on in our classroom:

Reading: In reading, we just finished up Unit 4. The big idea of Unit 4 was "How do different writers treat the same topic?" Each week, the students read different stories on the same topics written by different authors with different points of view.

Math/Science: The 4th graders are learning new concepts such as 2 digit by 2 digit multiplication, long division, and decimal placement to the thousandths place. For Science, we just finished up learning about our universe! We had so much fun doing this, so we decided to wrap up the chapter with the students either creating a model of the solar system. Their creations were amazing, and I am so proud of them!

Tech Integration: During the last few months of school I am going to be working with my 4th graders on coding strategies. Coding is a 21st century skill that aligns with many of the 4th grade standards. The best part about it is that you get to have fun while learning something new! Be sure to ask the 4G kiddos about what they have learned through coding!

Happy Learning!
Mrs. Gray

Physical Education

Hello Bel Air Families!

This past quarter we have been practicing the basics of good sportsmanship, positive communication and teamwork. These skills were then applied during our Floor Hockey Unit and Bowling Unit.

Coming up next, we will start a Tumbling Unit followed by a short Juggling Unit. Please keep your child's P.E. schedule in mind in regards to wearing sneakers. I know with this lovely, snowy weather boots are the safest choice for outside, but not so much in the gym.

Lastly, we have started a Dr. Seuss Fitness Challenge for the month of March. This challenge is encouraging students, and their families, to be active outside of P.E. class. All you have to do is roll a dice, perform that exercise that is represented by the number on the dice and cross out a fish for each exercise completed. Once all the fish are crossed out, bring in the signed Dr. Seuss Challenge sheet for a prize.
